The figure displays a time series plot with 'Point' on the x-axis (0 to 2000) and numerical values on the y-axis (-1 to 1). A legend on the right identifies 17 different traces. The first trace is labeled 'Full Trace'. The remaining 16 traces are identified by unique hexadecimal identifiers, all starting with a sequence of 32 zeros. The plot shows several overlapping traces, most of which remain very close to zero throughout the entire range. There is noticeable noise or jitter in the data, particularly visible between point 250 and 500 where the traces show more variation. Some traces exhibit small step-like changes or spikes, such as one trace dropping slightly below zero around point 350.
